

# Preguntas grupo 5

- 1) Their body is covered with fur or hair, they have lungs and the females produce milk to feed their young. (a)
  - a) **Mammals**
  - b) Reptiles
  - c) Birds
  - d) Viviparous
- 2) The reptiles body is covered with... (a)
  - a) **Scales**
  - b) Hair
  - c) Feather
  - d) Fur
- 3) Which of the following words is not in an animal cell: (a)
  - a) **Chloroplasts**
  - b) Organelles
  - c) Cell wall
  - d) Nucleus
- 4) Which of the following words is not in an plant cell: (c)
  - a) Membrane
  - b) Chloroplasts
  - c) **Organelles**
  - d) Cell wall
- 5) They are not considered living things (c)
  - a) Protozoa
  - b) Monera
  - c) **Viruses**
  - d) Amphibius

**6) Aquatic living things that they feed on other organisms (c)**

- a) Algae
- b) Virus
- c) Protozoa**
- d) Fish

**7) Which kingdom can you find multicellular living things? (a)**

- a) Animal and plant**
- b) Plant and monera
- c) Fungi and animal
- d) Plant and fungi

**8) Two characteristics of fishes are: (c)**

- a) They are viviparous and breathe with gills
- b) They are oviparous and her body was covered with feathers
- c) They are oviparous and breathe with gills**
- d) They are viviparous and her body was covered with feathers

**9) Which kingdom includes all microscopics living beings that only possess a single cell without nucleus.**

- a) **Monera kingdom**
- b) Protista kingdom
- c) Fungi kingdom
- d) None of the above answers is correct

**10) Cells of the same type join together to form:**

- a) Organs
- b) Organisms
- c) Systems
- d) Tissues**

**11) In one of the following kingdoms there can be unicellular and multicellular living things**

- a) Animal kingdom
- b) Bacteria kingdom
- c) Plant kingdom
- d) Protista kingdom**

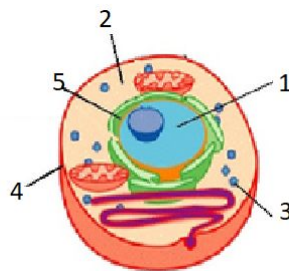

**12) Which of these plants is considered a seed plant?**

- a) Mosses and ferns
- b) Mosses and angiosperms
- c) Angiosperms
- d) Angiosperms and gymnosperms**

**13) In how many groups are invertebrates beings classified?**

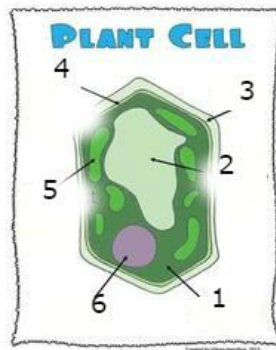

- a) In six groups: sponges, cnidarians, worms, mollusks, echinoderms and arthropods.**
- b) In three groups: worms, molluscs and arthropods
- c) In five groups: cnidarians, worms, mollusks, echinoderms and arthropods.
- d) None of the above answers is correct

**14) Choose the correct answer.**

- a) 1) nucleus 2) organelles 3) cell membrane 4) nuclear membrane 5) cytoplasm
- b) 1) nucleus 2) cytoplasm 3) organelles 4) cell membrane 5) nuclear membrane**
- c) 1) nucleus 2) cytoplasm 3) organelles 4) nuclear membrane 5) cell membrane
- d) 1) nucleus 2) organelles 3) nuclear membrane 4) cell membrane 5) cytoplasm

15) Choose the correct answer.

- a) 1) cytoplasm 2) nucleus 3) chloroplast 4) cell wall 5) cell membrane 6) vacuole
- b) 1) cell membrane 2) cell wall 3) vacuole 4) cytoplasm 5) nucleus 6) chloroplast
- c) **1) cytoplasm 2) vacuole 3) cell wall 4) cell membrane 5) chloroplast 6) nucleus**
- d) 1) cell membrane 2) chloroplast 3) vacuole 4) cytoplasm 5) nucleus 6) cell wall

16) A group of living cells called:

- a) **Tissue**
- b) Cell
- c) Organs
- d) Mold

17) Order this words from the biggest to the smallest.

- a) Cell, organ, tissue, organ system, organism.
- b) Organism, organ, organ system, tissue, cell.
- c) Organ system, organism, organ, tissue, cell.
- d) **Organism, organ system, organ , tissue, cell.**

18) Which one of the following kingdoms is not ovoviviparo

- a) Mammals and amphibians
- b) Reptiles
- c) Birds and fishes
- d) **Mammals**

19) Which characteristics does it have a non seed plant?

- a) **Do not produce flowers and they reproduce by spores**
- b) The elements of a non seed plants are: food store, embryo and spores
- c) They are unicellular living thing
- d) They feed with other organisms

**20. Which of these characteristics belong to the birds?**

- a) With wings, oviparous, covered with scales, when they are young through gills, with lungs and legs.
- b) They are oviparous, with gills, with wings, they have legs, with lungs, covered with fur or feathers.
- c) They are oviparous, covered with fur or hair, they have legs and wings, they breathe by gills.
- d) With lungs, covered with feathers, oviparous, they take care of their young, they have legs and wings.**
